

Carbon Footprint Green House Gas Summary

CO₂ Equivalents
by Weight
Generated by PP
47% less than
PET

9% less than
HDPE

51% less than PS

Source: Cradle-to-Gate Life Cycle Inventory report, prepared for ACC by Franklin Associates, 12/07

PP produces less CO₂ equivalents by weight than HDPE, PET, PS and PVC. This means that PP produces less atmospheric emissions that contribute to global warming as compared to these other plastics.
