

# Elkay® Take Out Bags

## OUTSTANDING FOOD PROTECTION AND SO MUCH MORE

Make sure your customers leave with a great impression. Elkay® Take Out Bags are made from strong and economical High Density material that won't rip or tear and provides a high degree of leak protection. The deep gussets help the bags stand without tipping over which allows them to be filled quickly and helps to reduce the chance of spilling. The bags have an integrated carry handle for your customers' comfort and convenience. They're available in a range of sizes to fit standard take out containers and are opaque white. In addition, many are made with a special controlled-life additive that allows them to break down in the presence of sunlight and oxygen.

Cardboard Bottom Insert Take Out Bag

### THE RIGHT TAKE OUT BAG:

- Extra wide gusset bottom allows bag to stand up on its own
- Easy opening for loading and unloading
- Carry or loop handles for easy carrying
- High Density Polyethylene for added strength and durability
- An array of available sizes offer flexibility and efficiency
- Colorful designs or plain white
- Custom printing and configurations available
- Many made with controlled-life technology to help protect the environment

Elkay® has a large and jumbo sized Take Out Bag that features a cardboard bottom insert for extra strength, allowing food containers to sit flat for safe transport from restaurant to destination. Perfect for caterers and large family take out meals!

Controlled-Life  
Plastics

### SOME THINGS ARE FOREVER. THIS BAG ISN'T ONE OF THEM.

This fully recyclable bag is made with a special controlled-life additive that will allow the bag to break down in the presence of sunlight and oxygen.

### CONTROLLED LIFE ADDITIVE

Many of Elkay's Take Out Bags are made with d2w® controlled-life technology. Thanks to d2w®, the bag will have a much shorter life than ordinary plastic if exposed to the open environment because the technology allows the bag to break down into harmless components after a pre-determined period of time (typically 18-24 months) in the outdoor environment. What sets d2w® apart from many alternatives is that poly bags made with this remarkable technology are still recyclable with regular plastics. Naturally, these bags are fully compliant with FDA requirements for food contact. You can get more information about d2w® online at [www.elkayplastics.com/environment](http://www.elkayplastics.com/environment)

### ELKAY® PLASTICS: YOUR ONE-STOP POLY BAG SOLUTION

Elkay® has the most complete line of FDA compliant poly bags for the Foodservice industry, so no matter what you're looking for, we're sure to have the right bag for the job. Eight strategically located distribution centers around the US ensure that the bags you need are available when you need them. "Thank You" Print

Restaurant operators will appreciate the strength of these bags and how quickly they can be loaded, thanks to the wide-opening Wave Top. Diners will appreciate the convenient carry handles and deep gussets that allow the bag to stand on its own to help prevent the contents from spilling.

These bags are designed for caterers, delis, bakeries and family restaurant take out orders, with additional strength built in and a sturdy cardboard insert in the broad base. The comfortable loop handles make the bag easy to carry, and the broad base helps prevent the bag from tipping over and spilling the contents. These bags can easily accommodate round trays, steam trays, bakery boxes and more.

### PLAIN WITH LOOP HANDLES

*Features a bottom cardboard insert for extra strength*
