

# ELKAY POLY APRONS

- Resistant to punctures and tears
- Embossed texture to improve durability
- Outstanding resistance to oils and grease
- Compliant with FDA requirements
- Available in two different sizes and a variety of mil thicknesses

Elkay poly aprons are ideal for foodservice applications because they are grease-proof, spill-proof and resistant to punctures and tears. Because these aprons are made with virgin polyethylene they comply with FDA requirements for food contact and are recyclable.

Elkay poly aprons are all made from Low Density Polyethylene and most of these items feature an embossed texture to improve durability and help keep the user cool. They are available in both white and clear.

Elkay has the broadest selection of products dedicated to the Foodservice Industry, allowing our customers to match just the right product to the requirements of the job. Find out more about our extensive line of Foodservice products at [www.elkayplastics.com/foodservice](http://www.elkayplastics.com/foodservice).
