

PERFORMANCE SEAL TOPS

- Specially designed to withstand elevated temperatures often encountered in Foodservice environments
- Four convenient sizes to choose from
- Seal top closure combines secure seal with convenient access
- Convenient packaging designed to promote cleanliness and reduce waste

Elkay's new Performance Seal Top Bags are now available for shipment. These bags are specifically targeted at users who need dependable bag performance at elevated temperatures. Many foodservice operators hold prepared items at temperatures up to 200 degrees F, and these bags offer outstanding performance in these conditions.

Performance Seal Tops are available in four convenient and common sizes. There are three 2 mil thick bags: 6" x 6" Sandwich, 6" x 8" Pint, and 7" x 8" Quart. These bags are packed in white cartons with inner packs of 100 bags each. The 10" x 12" Gallon is a 1.75 mil bag and is packed in a white dispenser carton.

Like all of Elkay's Seal Top bags, the Performance Seal Tops close securely and are easily opened, even with gloved hands, thanks to their offset lip and triple ridges. The bags are made with virgin polyethylene resin, so naturally they meet USDA and FDA requirements for use with food products.

Contact your Elkay Sales Representative today for more information about Elkay's new Performance Seal Tops.
